

Ring Size Chart

Print this chart on a US Letter size paper to determine the size of your ring.

Page scaling must be set to "none" on your printer dialog box and you must print at 100% - full size.

Verify the correct size of your print out by comparing the image below to a ruler.

If you have a ring that fits the finger to be sized, place it over the circles below, matching the inside edge of the ring to the drawing. If the ring falls between sizes, please contact the designer to have your ring made 1/4 larger or smaller than the sizes in the chart.

A ring must go on and off your finger easily.
